

PROHEART 6:

- ♥ Is convenient, putting assured compliance in your veterinarian's hands
- ♥ Is proven effective and safe in dogs of varying sizes and breeds
- ♥ May be prescribed to any healthy dog older than 6 months
- ♥ Also treats common hookworm (*Ancylostoma caninum* and *Uncinaria stenocephala*) infections present at the time of injection

TAKE THIS TO HEART.

Heartworm disease is a serious, potentially fatal illness transmitted to dogs by infected mosquitoes. Dogs in areas with high levels of mosquitoes are especially at risk. No matter the time of year. No matter whether they're indoors or out.

Heartworm risk is year-round. That's why continuous protection is critical.

**ASK YOUR
VETERINARIAN IF
PROHEART 6 IS RIGHT
FOR YOUR DOG.**

ProHeart[®] 6
(moxidectin)

IMPORTANT SAFETY INFORMATION: PROHEART 6 should be used in healthy dogs. Do not administer to sick, debilitated, underweight dogs or dogs that have a history of weight loss. Prior to administration, PROHEART 6 certified veterinarians should continue to assess patient health through a medical history, physical examination and if deemed appropriate, diagnostic testing. Continue to use caution when administering PROHEART 6 concurrently with vaccinations. Adverse events, including anaphylaxis, have been reported following the concomitant use of PROHEART 6 and vaccines. In some cases, anaphylactic reactions have resulted in death. Use with caution in dogs with pre-existing or uncontrolled allergic disease (food allergy, atopy or flea allergy dermatitis). Dogs receiving PROHEART 6 should be tested for existing heartworms as per the product label. In people, avoid PROHEART 6 contact with eyes. If contact with the eyes occurs, rinse thoroughly with water for 15 minutes and seek medical attention immediately. PROHEART 6 is available only to veterinarians through a restricted distribution program. Only certified veterinarians and staff can administer it. For more safety information, please refer to the full Prescribing Information inside.

ProHeart[®] 6
(moxidectin)

ONE
INJECTION.
ONE LESS
THING TO
REMEMBER.

For 6 full months of heartworm protection, leave it to the Pro.

zoetis

LEAVE IT TO THE PRO .

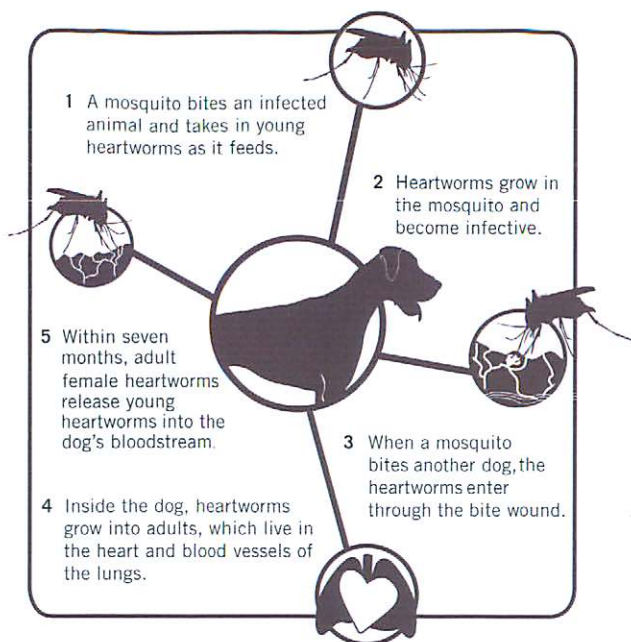

With one injection, ProHeart® 6 (moxidectin) protects dogs from heartworm infection for 6 full months. And, because it can only be administered by your veterinarian or a certified staff member at your clinic, ProHeart 6 takes the monthly responsibility off you and leaves it to another pro—your veterinarian.

You'll know your dog is protected. And you won't have to worry—about getting refills, giving monthly doses or, above all, about heartworm disease for 6 full months.

**6 Months
Continuous
Protection**

THE HEARTWORM LIFE CYCLE

One missed or delayed dose could lead to infection.

Heartworm disease has been diagnosed in all 50 states, and the disease is spreading each year. In many areas, it is transmitted year-round. In high-risk areas, even one month without treatment could mean a heartworm-positive diagnosis.¹

**PROHEART 6, EVERY 6
MONTHS, HELPS TO ENSURE
YEAR-ROUND PROTECTION.**

**ProHeart 6 is backed by a
Satisfaction Guarantee.**
